CEBU MEGALUBE

History

- Started in Used Oil recovery in Manila
- Challenged to recover oil from sludge
- Developed a proprietary method of separating emulsified oil and water
- Second factory in Cebu 1999
- Third site in Davao 2008
- At the request of EMB-DENR, the company started transporting, treating and processing Used Cooking Oil (I102) from commercial & industrial clients all over the Visayas.
- Megatreater Corporation started in 2018 to provide full spectrum hazardous waste and non-hazardous waste transport, disposal, and treatment services.

CEBU MEGALUBE

Services Offered

- We help businesses comply with environmental laws specifically R.A. 6969 and its implementing guidelines : DENR DAO 29-92 and 36-92 on managing, transport & disposal of hazardous wastes.
- We work closely with government agencies and private organizations to respond to environmental emergencies & crises.
- We guide and assist client companies meet compliance their haz-waste requirements with the DENR. Our environmental consultancy services include:
 - Technical expertise & advice from our DENR certified Pollution Control Officer
 - DENR-EMB Generator IDs
 - Permit To Operate
 - Permits to Transport
 - Waste Manifest preparation and other documentary requirements
- We process and convert hazardous wastes to safe and usable products.

CEBU MEGALUBE

National Coverage

- Our four strategically located DENR-certified Treatment, Storage & Disposal (TSD) plants allow us to serve large corporations on a nationwide scale.

CEBU MEGALUBE

Process Differentiation – Proprietary High Yield Process

Our DENR-certified processing facility utilizes proprietary processing technologies to achieve a wide range of products to exacting specifications.

- High recovery ratio
- Cost effective Process Method
- High quality products
- Low waste residue
- Quick Turnaround
- Highly sustainable

CEBU MEGALUBE

Process Differentiation – Other Operators' Process Methods

- Traditional backyard methods

- Mix and Blend method
- Heating method - costly
- Natural gravity method - slow
- Centrifuge – Expensive / Inefficient

- Net Result

- Low Quality
- Low Yield Ratio
- Waste accumulation – not sustainable

CEBU MEGALUBE

Our Professional Team

Cebu Megalube maintains full time professional staff and a highly-skilled engineering-technical team to meet our clients' environmental management needs. We work closely with the DENR & the Philippine Coast Guard to meet environmental emergencies.

Our hazardous waste disposal teams undergo regular environmental management and safety training programs conducted by the DENR and other agencies to ensure our operations meet the highest standards and comply with the provisions of R.A. 6969 and DAO 29-92.

CEBU MEGALUBE

Hazardous Waste Transports

The companies own and operate a fleet of over 20 DENR certified / registered hazardous waste trucks and lorries which collect several thousand tons of hazardous waste annually.

CEBU MEGALUBE

Hazardous Waste Transports & Equipment

All vehicle operators are Hazchem-trained by the DENR EMB and carry the necessary documentation for the transportation of hazardous flammable liquids in compliance with R.A. 6969 and DAO 2013-22.
